

Unpack the entire contents of both boxes and remove plastic wrapping.

Fully expand the folding step unit

Insert the legs into the step leg bracket from the bottom and tighten securely by hand.

Attach the Port-A-Step unit to the top or next step of your RV depending on height and terrain and pull the step unit to fully extended position. Adjust the legs to desired height where steps are level.

Attach the handrail to the handrail bracket and hand tighten with wing bolts

To remove simply remove the handrails, lift the unit off and fold for storage.
